

Non-Native Species of the Great Lakes Project Checklist

Research:

- I have located four reliable, authoritative resources.
- I have added the four reliable, authoritative resources to my favorites.
- I have completed research grids for my portion of the project.
- I have located and saved images for my project.
- I have created a rough draft.
- I have created citations for my resources and images and pasted them into a new document.

Required Information:

- Description of what a non-native species is
- Identify general effects of non-native species
- Describe a specific non-native species
- Describe the original location and current location of the species
- Describe current status of the species within the Great Lakes
- Describe what government agencies are doing to remove or stop the spread of the species
- Discuss the impact of the non-native species on the ecosystem
- Discuss the economic impact of the non-native species

Desktop Publishing Concepts:

- I have demonstrated the concept of contrast
- I have demonstrated the concept of balance
- I have demonstrated the concept of proportion
- I have demonstrated the concept of rhythm
- I have demonstrated the concept of white space
- I have limited my font styles, sizes and colors to 2 or 3

Turn in the following:

- Research Grid
- Rough draft of text
- Rough draft of brochure
- Citations
- Final Brochure
